1	Appreciate and express the art and science of interaction design, inclured in software design and development.	uding i	ts the	ories, p	rincipl	es, me	thodo	logies,	and
1a	Understand and express how interaction design relates to mental models.		+	+					+
1b	Understand and describe core interaction design concepts: usability metrics; interaction design guidelines, principles, & theories; interaction styles; and affordances & natural mappings.		ı	+					+
2	Understand and report on how humans behave and interact with the u	ser int	erface	s of re	al-wor	ld syst	tems a	nd sof	twar
2a	Conduct and document a real-world study of how a cohort of users responds to a particular user interface, including but not limited to capturing and prioritizing usability metrics and correlating results to mental models and interaction design theories.		I	I					I
2b	Effectively use: usability metrics; interaction design guidelines, principles, & theories; interaction styles; and affordances & natural mappings to make appropriate, well-founded interaction design decisions.		1	+					+
3	Demonstrate the fundamentals behind designing and implementing user interfaces.								
Ba	Know and understand how user interfaces are constructed, especially the model-view-controller (MVC) paradigm.								
3b	Know and understand event-driven programming.								
ŀ	Follow academic and technical best practices throughout the course.								
la	Write syntactically correct, functional code.								
lb	Demonstrate proper separation of concerns, especially MVC.								
С	Write code that is easily understood by programmers other than yourself.								
ld	Use available resources and documentation to find required information.	+	- 1						- 1
le	Use version control effectively.	+	/	+					
f	Meet all designated deadlines.	+	+	+					+
